(54) CONTROLLER FOR TRANSMISSION

(57)Abstract:

PROBLEM TO BE SOLVED: To release the fixation of a solenoid valve opening and closing a pneumatic pressure to be supplied to a pneumatic cylinder performing shift control of a transmission and, in particular, release the fixation of the solenoid valve of a vehicle not used for a long period of time.

SOLUTION: A pneumatic pressure having a high air pressure is temporarily fed at such timing that driving operation is started to open and close all the solenoid valves temporarily.

LEGAL STATUS

[Date of request for examination] 28.06.2000

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 3443609

[Date of registration] 27.06.2003

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
